LEAN FOR COMMERCIAL

Lean for Commercial Trucks

Rapid Improvement Workshops

Commercial Truck Green Belt Training

THE PRACTICAL APPLICATION OF LEAN SIX SIGMA TAILORED FOR COMMERCIAL TRUCK COLLISION REPAIR

The curriculum has been carefully developed to provide an effective balance between teaching the proven science behind process improvement and implementing practical solutions for driving best-in-class performance in an environment that allows the participants to learn in the classroom and to understand how to apply in their collision center. The size or volume of a collision center doesn't necessarily determine success in today's marketplace nor are they qualifications for MVP Commercial Truck Green Belt Training. If your shop has a vision for the future—and a strong sense of urgency to prepare for it—plus a willingness to accept, change and commit to a culture of continuous process improvement, you're an ideal candidate for MVP Commercial Truck Green Belt Training.

Commercial Truck Green Belt at a Glance

A comprehensive, 3.5 day training program based on the practical application of Lean Six Sigma

Intense classroom & exercises are all aimed at giving your shop the competitive advantage of Quality, Speed and Cost.

WHO SHOULD ATTEND Ideally, those persons most responsible for leading change in your organization—the owner, manager and lead technician—should together attend MVP Commercial Truck Green Belt Training, enabling the formation of a leadership team for change.

Lean for Commercial

Re-Engineering the Processes for
Success Today and in the Future

The competitive advantage of
Quality, Speed, and Cost performance
for extraordinary profitable growth
opportunities!

Today's rapidly changing commercial truck collision repair industry offers significant opportunities for the collision repair facility that is equipped with the knowledge, expertise and commitment to evolve with emerging trends and meet the challenge of change head on. The real key to future success lies in lowering cycle time and processing more work with existing assets. It requires a well-planned, re-engineering of the entire traditional repair process. It also requires leadership, the right talent and a culture committed to continuous improvement that is measurable and market-driven. Those who can deliver Quality and Speed while improving their Cost structure will enjoy an extraordinary competitive advantage.
